CURRICULUM VITAE (CV) ABDUR RAZZAK ZUBAER

Career Objective : I aim to excel as a lecturer in the Civil Engineering Department by fostering a dynamic learning environment and conducting impactful research in the field of Environmental Engineering. I intend to contribute to sustainable development, climate change adaptation, and improved transportation systems through innovative research and collaboration with academia, industry, and communities while inspiring students to become future leaders in Civil Engineering.

Name of Expert : ABDUR RAZZAK ZUBAER

Current Residential Address : 59/2 Horonath Ghosh Road, Lalbagh, Dhaka.

Mobile No. : +8801853399055

E-Mail Address : abdur.razzak@civil.wub.edu.bd

LinkedIn Profile : Abdur Razzak Zubaer

Digital Portfolio : Abdur Razzak Zubaer

ResearchGate Profile : Abdur Razzak Zubaer

Google Scholar Profile : Abdur Razzak Zubaer

Date of Birth : 4 August 1998

Citizenship : Bangladeshi

Educational Background :

Institute	Degree	Year
Bangladesh University of Engineering and Technology	Master of Science in Environmental Engineering	Ongoing
Bangladesh University of Professionals	M.Sc. in Environmental Science & Management	2023
Ahsanullah University of Science & Technology	B.Sc. in Civil Engineering	2021
Dhaka City College	HSC	2016
University Laboratory School & College	SSC	2014
University Laboratory School & College	JSC	2011

Membership :
- Member; The Institution of Engineers, Bangladesh (M53458)

Licenses & Certifications :
- Global Environmental Management
- Environmental and Social Framework – ESF Fundamentals
- Introduction to the World Bank Environmental and Social Framework

Training :
- Training on OBE: Develop courses and assessments based on measurable learning outcomes.
- Training on CO–PO Mapping and Attainment Analysis: Conduct Course Outcome and Program Outcome mapping and attainment.

Work Experience Locations : Bangladesh

Languages :

	Speaking	Reading	Writing
English	Proficient	Proficient	Proficient
Bengali	Native	Native	Native

Employment Record :

From	To	Employer	Positions Held
Jan 2025	On-Going	World University of Bangladesh	Lecturer & Coordinator
Apr 2024	Jan 2025	Environment and Resource Analysis Center (ENRAC)	Environmental Engineer
Oct 2022	Mar 2024	ACE Consultants Limited (Subsidiary of SMEC International Pty Ltd.)	Junior Environmental Engineer
Apr 2022	Sep 2022	ACE Consultants Limited (Subsidiary of SMEC International Pty Ltd.)	Graduate Engineer
Jul 2021	Mar 2022	Eagle Fibre Industries Ltd.	Environmental Engineer
Jan 2020	Jun 2021	Ahsanullah University of Science and Technology	Research Assistant

Projects/Works Undertaken:
Employer: World University of Bangladesh

Timeline: January 2025 to Ongoing

Location: Dhaka

Position held: Lecturer

Courses Taken: Hydrology, Advanced Surveying, Solid Waste Management, Railway Engineering, Fluid Mechanics Lab, Water Resource Engineering Sessional, and Environmental Engineering Sessional II

Activities Performed:

- Teaching and Curriculum Development.
- Research and Publications.
- Student Mentorship and Support.
- Administrative Duties.
- Quality Assurance and Accreditation.

Project Name: Consultancy Services for Environmental and Social Assessment and Mitigation Measures for the Gas Sector Energy Efficiency Improvement Project.

Funding Agency: Asian Infrastructure Investment Bank (AIIB)

Client: Bakhrabad Gas Distribution Company Limited (BGDCL)

Timeline: November 2024 to January 2025 (Intermittent)

Location: Dhaka

Position held: Environmental Engineer

Activities Performed:

- Conduct comprehensive EIAs and IEEs, identifying potential environmental risks and proposing mitigation measures.
- Review baseline environmental data, including air, water, soil, biodiversity, and socio-economic factors, to develop detailed assessment reports.
- Engage with clients, regulatory bodies, local communities, and other stakeholders to communicate findings and address concerns.
- Develop and recommend mitigation measures to minimize adverse environmental impacts during project design and implementation.
- Establish environmental monitoring plans to ensure compliance during project execution.
- Accumulation of Primary Data from the Environmental Quality Survey.

Project Name: Floating Solar PV Project at Bakreshwar Reservoir in Birbhum District, West Bengal, India.

Funding Agency: Asian Development Bank (ADB)

Client: West Bengal Power Development Corporation (WBPDCL)

Timeline: August 2024 to January 2025 (Intermittent)

Location: Dhaka

Position held: Environmental Engineer

Activities Performed:

- Conduct comprehensive EIAs and IEEs, identifying potential environmental risks and proposing mitigation measures.
- Review baseline environmental data, including air, water, soil, biodiversity, and socio-economic factors, to develop detailed assessment reports.
- Facilitate collaboration among environmental scientists, engineers, sociologists, and economists in the assessment process.
- Monitor team performance, resolve conflicts, and foster a collaborative and productive work environment.
- Engage with clients, regulatory bodies, local communities, and other stakeholders to communicate findings and address concerns.
- Develop and recommend mitigation measures to minimize adverse environmental impacts during project design and implementation.
- Establish environmental monitoring plans to ensure compliance during project execution.
- Prepare and present technical reports, proposals, and findings to clients and regulatory authorities.

Project Name: Expansion of Matuail Sanitary Landfill Including Land Development Project.

Funding Agency: Government of Bangladesh (GoB)

Client: Dhaka South City Corporation (DSCC)

Timeline: June 2024 to January 2025 (Intermittent)

Location: Dhaka

Position held: Environmental Engineer

Activities Performed:

- Conduct comprehensive EIAs and IEEs, identifying potential environmental risks and proposing mitigation measures.
- Review baseline environmental data, including air, water, soil, biodiversity, and socio-economic factors, to develop detailed assessment reports.
- Plan and manage the entire EIA and IEE process, including scoping, stakeholder consultation, data collection, and report preparation.
- Develop project timelines, allocate resources, and oversee deliverables to meet deadlines.
- Facilitate collaboration among environmental scientists, engineers, sociologists, and economists involved in the assessment process.
- Ensure all assessments comply with local, national, and international environmental regulations and standards.
- Assign responsibilities, provide training, and guide team members in achieving high-quality outputs.
- Monitor team performance, resolve conflicts, and foster a collaborative and productive work environment.
- Engage with clients, regulatory bodies, local communities, and other stakeholders to communicate findings and address concerns.
- Develop and recommend mitigation measures to minimize adverse environmental impacts during project design and implementation.
- Establish environmental monitoring plans to ensure compliance during project execution.
- Prepare and present technical reports, proposals, and findings to clients and regulatory authorities.

Project Name: Railway Connectivity Improvement Preparatory Facility Project.

Funding Agency: Asian Development Bank (ADB)

Client: Bangladesh Railway (BR)

Timeline: April 2024 to January 2025 (Intermittent)

Location: Dhaka

Positions held: Environmental Engineer

Activities Performed:

- Conduct comprehensive EIAs and IEEs, identifying potential environmental risks and proposing mitigation measures.
- Review baseline environmental data, including air, water, soil, biodiversity, and socio-economic factors, to develop detailed assessment reports.
- Plan and manage the entire EIA and IEE process, including scoping, stakeholder consultation, data collection, and report preparation.
- Develop project timelines, allocate resources, and oversee deliverables to meet deadlines.
- Facilitate collaboration among environmental scientists, engineers, sociologists, and economists involved in the assessment process.
- Ensure all assessments comply with local, national, and international environmental regulations and standards.
- Lead and manage multidisciplinary teams to ensure seamless coordination and execution of environmental studies.
- Assign responsibilities, provide training, and guide team members in achieving high-quality outputs.
- Monitor team performance, resolve conflicts, and foster a collaborative and productive work environment.
- Engage with clients, regulatory bodies, local communities, and other stakeholders to communicate findings and address concerns.
- Develop and recommend mitigation measures to minimize adverse environmental impacts during project design and implementation.
- Establish environmental monitoring plans to ensure compliance during project execution.
- Organize public hearings and consultations to incorporate stakeholder input into environmental management plans.
- Prepare and present technical reports, proposals, and findings to clients and regulatory authorities.

Project Name: Environmental and Social Impact Assessment for Gazaria 50 (±10%) MW Solar PV Power Plant Project at Gazaria, Munshiganj.

Client: Rural Power Company Limited (RPCL)

Timeline: April 2024 to January 2025 (Intermittent)

Location: Dhaka

Position held: Environmental Engineer

Activities Performed:

- Conduct comprehensive EIAs and IEEs, identifying potential environmental risks and proposing mitigation measures.
- Review baseline environmental data, including air, water, soil, biodiversity, and socio-economic factors, to develop detailed assessment reports.
- Plan and manage the entire EIA and IEE process, including scoping, stakeholder consultation, data collection, and report preparation.
- Develop project timelines, allocate resources, and oversee deliverables to meet deadlines.

Project Name: Preparation of Comprehensive Transport Master Plan with Pre-Feasibility Study of Mass Transit Network & Conceptual Design of Multimodal Hub for Narayanganj City Corporation.

Client: Narayanganj City Corporation (NCC)

Timeline: March 2023 to June 2024 (Intermittent)

Location: Dhaka

Position held: Junior Environmental Engineer

Activities Performed:

- Conduct comprehensive EIAs and IEEs, identifying potential environmental risks and proposing mitigation measures.
- Review baseline environmental data, including air, water, soil, biodiversity, and socio-economic factors, to develop detailed assessment reports.
- Plan and manage the entire EIA and IEE process, including scoping, stakeholder consultation, data collection, and report preparation.
- Develop project timelines, allocate resources, and oversee deliverables to meet deadlines.
- Facilitate collaboration among environmental scientists, engineers, sociologists, and economists involved in the assessment process.
- Ensure all assessments comply with local, national, and international environmental regulations and standards.
- Engage with clients, regulatory bodies, local communities, and other stakeholders to communicate findings and address concerns.
- Develop and recommend mitigation measures to minimize adverse environmental impacts during project design and implementation.
- Establish environmental monitoring plans to ensure compliance during project execution.
- Prepare and present technical reports, proposals, and findings to clients and regulatory authorities.

Project Name: Consultancy Services for Detailed Feasibility Study and Design of 6 (Six) Important Bridges.

Funding Agency: Islamic Development Bank (IsDB)

Client: Roads and Highways (RHD)

Timeline: March 2023 to March 2024 (Intermittent)

Location: Dhaka

Position held: Junior Environmental Engineer

Activities Performed:

- Led the preparation and coordination of desktop studies, with a focus on environmental components, ensuring compliance with relevant environmental regulations and guidelines.
- Managed the budget estimation process for baseline environmental monitoring activities, ensuring that all necessary resources and costs were accounted for, and providing financial oversight for environmental projects.
- Developed and oversaw the implementation of methodologies for environmental quality surveys, ensuring the use of industry best practices and alignment with project goals.
- Prepared and reviewed the Terms of Reference (ToR) for environmental quality surveys, outlining the scope, objectives, and deliverables to guide the survey process effectively.
- Coordinated the development of Terms of Reference (ToR) for Environmental Impact Assessments (EIAs), ensuring alignment with regulatory requirements and client expectations.
- Led the drafting and review of the Environmental Component of Feasibility Reports, working closely with project teams to integrate environmental considerations into project planning and decision-making processes.
- Managed the finalization of the Environmental Component of Feasibility Reports, incorporating stakeholder feedback and ensuring the document met quality and compliance standards.
- Prepared and managed the compilation of Initial Environmental Examination (IEE) reports, ensuring thorough assessments of potential environmental impacts and recommending appropriate mitigation measures.

Project Name: Consultancy Services for Feasibility Study, Detailed Design, and Other Preparatory Study of the Dhaka –Chattogram National Highway.

Funding Agency: Asian Development Bank (ADB)

Client: Roads and Highways (RHD)

Timeline: November 2023 to January 2024 (Intermittent)

Location: Dhaka

Position held: Junior Environmental Engineer

Activities Performed:

- Conducted and led reconnaissance surveys focusing on the environmental component of projects, identifying key environmental features, constraints, and opportunities to inform project planning and decision-making.
- Managed the preparation and execution of desktop studies for environmental components, gathering and analyzing relevant data to assess potential environmental impacts and ensure regulatory compliance.
- Developed and prepared detailed Terms of Reference (ToR) for environmental quality surveys, defining the scope, methodology, and objectives to guide data collection and analysis.
- Led the preparation of the Environmental Component of Feasibility Reports, collaborating with cross-functional teams to integrate environmental considerations into project feasibility assessments and providing recommendations for sustainable development.

Project Name: Proposal Submission of UAE OMAN Railway Link Project (ABU DHABI – SOHAR) for Environmental Impact Assessment and Environmental Management Plan.

Client: Ministry of Transport and Communications, OMAN Rail

Timeline: September 2023 to October 2023 (Intermittent)

Location: Dhaka

Position held: Junior Environmental Engineer

Activities Performed:

- Led the preparation of comprehensive Environmental Impact Assessments (EIAs), including the identification, evaluation, and documentation of potential environmental impacts, and the development of mitigation strategies to ensure compliance with environmental regulations and project sustainability.
- Developed and coordinated the preparation of Environmental Management Plans (EMPs), outlining strategies for managing environmental impacts throughout the project lifecycle, including monitoring, mitigation, and reporting to ensure adherence to environmental standards and best practices.

Project Name: Feasibility Study and Detailed Design for Construction of 2nd Sultana Kamal Bridge on Regional Highway and Upgrading Two Intersections on National Highways.

Client: Roads and Highways (RHD)

Timeline: March 2023 to August 2023 (Intermittent)

Location: Dhaka

Position held: Junior Environmental Engineer

Activities Performed:

- Conducted desktop studies focusing on environmental components, gathering and analyzing relevant environmental data to assess potential impacts and inform project planning and decision-making.
- Developed and finalized the methodology for Initial Environmental Examinations (IEE), establishing the framework for data collection, impact assessment, and compliance with environmental regulations.
- Estimated budgets for baseline environmental monitoring, ensuring accurate cost projections for data collection and analysis required to assess environmental conditions before project initiation.
- Contributed to the preparation of the Environmental Component of Feasibility Reports, collaborating with cross-functional teams to assess environmental risks and propose sustainable solutions in the initial draft of the report.

Project Name: Detailed Feasibility Study, Preliminary Design, and Detail Design of 8 Important Bridges in Mymensingh Zone Project.

Funding Agency: Islamic Development Bank (IsDB)

Client: Roads and Highways (RHD)

Timeline: March 2023 to August 2023 (Intermittent)

Location: Dhaka

Position held: Junior Environmental Engineer

Activities Performed:

- Conducted detailed desktop studies for the environmental component of projects, gathering and analyzing relevant data to assess environmental conditions and potential impacts, ensuring regulatory compliance and informed decision-making during the project planning phase.
- Managed the budget estimation process for baseline environmental monitoring, accurately forecasting the resources required for data collection, analysis, and compliance with environmental standards throughout the project lifecycle.
- Contributed to the preparation of the Environmental Component of the Draft Feasibility Report, collaborating with interdisciplinary teams to assess environmental impacts, identify mitigation measures, and provide recommendations for sustainable project development.

Project Name: Dhaka Outer Ring Road Project.

Timeline: January 2023 to February 2023

Location: Dhaka

Position held: Junior Environmental Engineer

Activities Performed:

- Conducted comprehensive desktop studies, gathering and analyzing environmental data to evaluate potential impacts and inform the project's environmental strategy, ensuring regulatory compliance and effective decision-making.
- Led the preparation of the Environmental Component of the Draft Feasibility Report, collaborating with cross-functional teams to assess environmental risks, develop mitigation measures, and incorporate sustainable practices into project planning.
- Managed the preparation and finalization of the Environmental Component of the Final Feasibility Report, ensuring that all environmental considerations were thoroughly documented and that the report met regulatory and stakeholder expectations.
- Developed and prepared Terms of Reference (ToR) for environmental quality surveys, defining the scope, objectives, and methodology for data collection and analysis, ensuring that the survey aligned with project goals and environmental standards.

Project Name: Consultancy Services for Feasibility Study and Detailed Design for Construction of New Broad Gauge Railway Line from Darshana to Meherpur via Damurhuda and Mujibnagar (DMMRP).

Client: Bangladesh Railway (BR)

Timeline: October 2022 to December 2022

Location: Dhaka

Position held: Junior Environmental Engineer

Activities Performed:

- Led the preparation and finalization of the Environmental Component of Feasibility Reports, coordinating data collection, analysis, and the integration of environmental considerations to assess the potential impacts and viability of projects.
- Managed and conducted the preparation of Environmental Impact Assessments (EIA), identifying, evaluating, and documenting potential environmental impacts, and recommending mitigation measures to ensure compliance with regulatory requirements and sustainable development goals.

Project Name: Consultancy Services for Feasibility Study and Detailed Design for Construction of New Broad Gauge Railway Line from Darshana to Meherpur via Damurhuda and Mujibnagar (DMMRP).

Client: Bangladesh Railway (BR)

Timeline: April 2022 to September 2022

Location: Dhaka

Position held: Graduate Engineer

Activities Performed:

- Assisted in operation management by coordinating project workflows, ensuring that engineering processes and tasks were executed efficiently and on schedule to meet project goals.
- Supported stakeholder management by maintaining clear communication with internal teams, clients, and external partners, addressing concerns and ensuring alignment with project objectives.
- Contributed to project planning and forecasting by assisting in the development of project timelines, resource allocation, and risk assessments, ensuring accurate projections and timely project delivery.
- Facilitated resource mobilization by assisting in the identification, procurement, and allocation of necessary resources, ensuring the timely availability of materials, equipment, and personnel for project execution.

Project Name: Rehabilitation of BSCIC Industrial Park.

Timeline: July 2021 to March 2022

Location: Munshiganj

Position held: Assistant Environmental Engineer

Activities Performed:

- Conducted thorough identification and assessment of environmental risks and hazards associated with projects, analyzing potential impacts to develop strategies for risk mitigation and compliance with environmental regulations.
- Promoted and recommended environment-friendly mitigation measures, designing and implementing strategies to reduce environmental footprints and enhance sustainability throughout the project lifecycle.
- Led and facilitated environmental auditing processes, conducting comprehensive audits to evaluate project compliance with environmental standards and regulations, and providing actionable recommendations for improvement.

Project Name: Feasibility Study on Concrete Dust as a Substitute of Filling Sand for Road Construction.

Timeline: January 2020 to June 2021 (Intermittent)

Location: Dhaka

Position held: Research Assistant

Activities Performed:

- Conduct comprehensive literature reviews to gather relevant information and insights.
- Assist in designing and implementing surveys, experiments, and field studies.
- Collect and compile qualitative and quantitative data from primary and secondary sources.
- Analyze data using statistical tools, software, or models, ensuring accuracy and relevance.
- Prepare graphs, charts, and visualizations to communicate research findings effectively.
- Contribute to interpreting results and deriving meaningful conclusions.
- Draft, edit, and format research reports, proposals, and academic publications.
- Maintain accurate records of research activities, data, and findings.
- Assist in preparing presentations for conferences, workshops, or meetings.
- Collaborate with team members to plan and execute research activities according to project timelines.
- Provide administrative support for project management, including scheduling, budgeting, and communication.
- Ensure compliance with research ethics and protocols, including obtaining necessary approvals.
- Coordinate with collaborators, sponsors, and stakeholders to facilitate smooth project execution.

Project Name: An Overview of Foot Over-Bridge at Dhaka City.

Timeline: January 2020 to June 2021 (Intermittent)

Location: Dhaka

Position held: Research Assistant

Activities Performed:

- Conduct comprehensive literature reviews to gather relevant information and insights.
- Assist in designing and implementing surveys, experiments, and field studies.
- Collect and compile qualitative and quantitative data from primary and secondary sources.
- Analyze data using statistical tools, software, or models, ensuring accuracy and relevance.
- Prepare graphs, charts, and visualizations to communicate research findings effectively.
- Contribute to interpreting results and deriving meaningful conclusions.
- Draft, edit, and format research reports, proposals, and academic publications.
- Maintain accurate records of research activities, data, and findings.
- Assist in preparing presentations for conferences, workshops, or meetings.
- Collaborate with team members to plan and execute research activities according to project timelines.
- Provide administrative support for project management, including scheduling, budgeting, and communication.
- Ensure compliance with research ethics and protocols, including obtaining necessary approvals.
- Coordinate with collaborators, sponsors, and stakeholders to facilitate smooth project execution.
